PREMIER PEAT MOSS

The ALL ORGANIC SOIL CONDITIONER

GARDENS—Peat Moss aids the gardener by improving the texture of the soil. After Peat Moss is worked into the soil, the soil works easier and holds moisture longer. A one-inch layer of Peat improves the appearance of any flower garden and prohibits the growth of many weeds.

SHRUBS—Most nurserymen recognize the value of Peat Moss and work liberal quantities into the soil when transplanting evergreens and shrubs. A one-inch layer gives the planting a finished look, holds the moisture and reduces weed growth.

Bunton's Lawn Seeds have a growing reputation!

BUNTON'S MAPLE SHADE LAWN SEED

Especially blended for problem areas where shade and shallow fibrous rooted trees are present. The low feeding characteristics of the grasses in this mixture are best suited to areas under maples and other shallow rooted trees. Bunton's Maple Shade contains our heaviest top quality seed. Lawn areas under trees should receive light applications of Bunton's Grower at regular intervals. 1 lb. of seed will sow 300 sq. ft.

BUNTON'S BEST LAWN SEED

The proper blend of adapted grasses for the Kentuckiana area. This seed will quickly produce a rich green permanent turf in sunny or partial shaded areas. Laboratory tested to assure noxious weed free seed. Contains 75% Ky. Blue Grass. This extra heavy seed requires only 1 lb. to sow 300-400 sq. ft. of new lawn.

BUNTON'S BEST KY. BLUE GRASS

Blue Grass, truly the King of lawn grasses and the best adapted grass for soil and climatic conditions in this area. Bunton's Best is super cleaned and refined to select the heavy plump seed with the highest purity and germination. Laboratory tests prove that you receive more for your money with Bunton's Best.
